ABOUT ME

Computer Engineering under-graduate specializing in backend architectures, mobile development, and workflow automation. Proficient in TypeScript, Javascript, and Python, with a strong affinity for Linux environments and network engineering. I build clean APIs, maintain open-source developer tools, and love turning complex system requirements into scalable, elegant software solutions.

EDUCATION

Çukurova Üniversitesi
Bachelor of Science / Computer Engineering
2023 – 2027

Konya Gıda ve Tarım Üniversitesi
Bachelor of Science / Computer Engineering
2021 – 2023 | (Transferred)

LANGUAGES

English (Fluent)
Turkish (Native)

SKILLS

Programming Languages:

JavaScript, TypeScript, Python, C, C++, SQL

Backend Development:

Node.js, NestJS, Prisma ORM, REST APIs

Frontend & Mobile:

HTML, CSS, React Native, React, Expo

Databases:

PostgreSQL, MongoDB

Systems & DevOps:

Linux (Arch-based & Debian-based distributions), Shell Scripting (Bash), Git/GitHub, ROS

Networking & Core CS:

Computer Networks, CLI Tool Development, Process Automation

PROJECTS

yayy & aptt

Interactive Package Management CLI Tools

Developed standalone terminal utilities for **Arch-based** and **Debian-based** Linux distributions, automating package installation and system maintenance via Bash scripting and fuzzy-search mechanics. Originally built to help friends and family transition into Linux, with a focus on making the command line less intimidating for non-technical users.

Network Diagnostic & Tool Package (NETDiagTP)

Python CLI Network Diagnostic Toolkit

Developed a modular Python CLI toolkit for network diagnostics, featuring TCP/UDP socket programming, real-time multi-client chat via threading, SNTP time synchronization, and echo/error testing across 6+ modules.

eva-unit-01

Autonomous Navigation System

Built an autonomous robot navigation system using ROS (Robot Operating System) on Ubuntu 20.04, implementing sensor integration, real-time path planning, and obstacle avoidance with SLAM-based localization.

Untitled Mobile App (In Progress)

Collaboratively developing a cross-platform mobile productivity app using React Native and Expo, with a NestJS backend and Prisma ORM.
